

Strategies for Focusing on the Communities Surrounding the 2,000 Lowest-Performing Schools

Analysis conducted by the Everyone Graduates Center at Johns Hopkins University has identified approximately 2,000 high schools across the country that account for over half of all students who drop out and over two-thirds of the minority students who leave school without a diploma. These lowest-performing schools are found in every state – in both rural and urban areas. Given that we know where the problem is most acute, America's Promise Alliance is poised to serve as a catalyst for action – helping communities move from an overall awareness of the problem to a focus on community solutions.

Our goal is to ensure holistic supports and resources are directed towards the young people, schools and neighborhoods that need them most. By focusing efforts on the communities that are home to the most challenged schools, we can have the greatest possible impact on the national crisis. The Alliance will use ten milestone indicators as a framework for engagement, to help assess gaps in community resources, provide targeted assistance, and track progress.

Given our core strengths and assets, and the ongoing support of partners who have focused on supporting local community engagement – including the United Way, State Farm Insurance, and others – we believe we can best support the young people in these communities in the following ways:

1. Community Engagement: Going Deeper

- Work deeply within the current cohort of Featured Communities to identify what needs doing and “get it done.” This work may include activities such as:
 - Leverage presence of APA-funded coordinators to identify and develop priorities and strategies for deeper levels of engagement.
 - Identify 2-3 key national partners to provide specific services within communities whose schools are improving practices.
- Expand intensive local efforts in communities with large numbers of the 2,000 lowest performing schools by adding a 2nd cohort of Featured Communities. Methods of selecting additional communities might include:
 - Funder priority,
 - Strong summit follow-up/action plans,
 - Status as a strong Promise Neighborhood “runner up;” or
 - Other relevant rationales.
- Open doors for and support Alliance Partners poised to support communities and schools. For instance:
 - The National Association of Manufacturers is interested in working with secondary schools around its “stacked” credentialing program, but is finding it challenging to identify and connect with communities and schools who would be good partners.

- Provide technical assistance to communities through a strong knowledge management platform based on Duke evaluation and other methods of community-based research/assessment. This work might include activities such as:
 - Highlighting innovative evidence-based best practices through direct lessons learned via FC's, APA action research and Duke evaluation.
 - Utilizing technology platform for disseminating assistance in web-based formats(i.e. conferences, webinars, training and resource libraries)
- Work with communities on use of data to drive solutions. Doing this might involve:
 - In direct coordination with the TA, providing community-specific training for collaborative partners on data collection and usage.
 - Introducing communities to the importance of longitudinal data systems.

2. Community Awareness

- Emphasize the Dropout Crisis and Low-Performing Schools issues as community issues in all external communication (talking points, speeches, relevant media/marketing materials, funding proposals, etc.)
- Make a “deep dive” with targeted communities to support local awareness raising by:
 - Conducting research-based message testing for communities
 - Providing local communications trainings
 - Creating a communications toolkit highlighting local statistics about the graduation crisis and the lowest performing high schools and their communities
 - Developing and distributing talking points for local spokespeople
- Focus national awareness-raising on the frame of lowest-performing schools and seek opportunities for macro-level messaging about the crisis within those communities by
 - Including talking points regarding 2000 schools in support for the Alliance’s Speakers Bureau
 - Using the Communication Advisory Group to raise awareness through additional organizations’ communications efforts.

3. Cross Cutting Youth Voice/Engagement

- Intentionally engage young people from the communities that are home to the 2000 lowest performing schools in Grad Nation planning and events.
- Target these young people as part of the larger I-5 Youth Engagement effort, including targeted publicizing of grant programs to these communities.

Much is known about what comprises strong community collaboration. And much is known about individual youth development programs and school reform models that substantively and positively impacts the lives of young people. However, little is known about how community collaborations integrate and align effective programming, impact community-level factors, and engage parents in the educational transformation process. To that end, we will work with our engaged communities to build this important knowledge-base; what we consider to be the missing link in transformation for young people at the community level.

We believe these activities are our best effort at driving support to the most vulnerable young people and the communities in which they live. Our desire is to be a catalyst for action – providing tools,

technical assistance and access to information and resources via web-based tools that will change outcomes for young people in these communities. The efforts catalyzed will, in the short term, lead to:

- More integrated, cross-sector community efforts and services.
- More focus on resources going to the children, schools, and communities that need them most.
- More emphasis on evidence based practices in services provided.
- More cross-sector engagement to close the achievement gap.

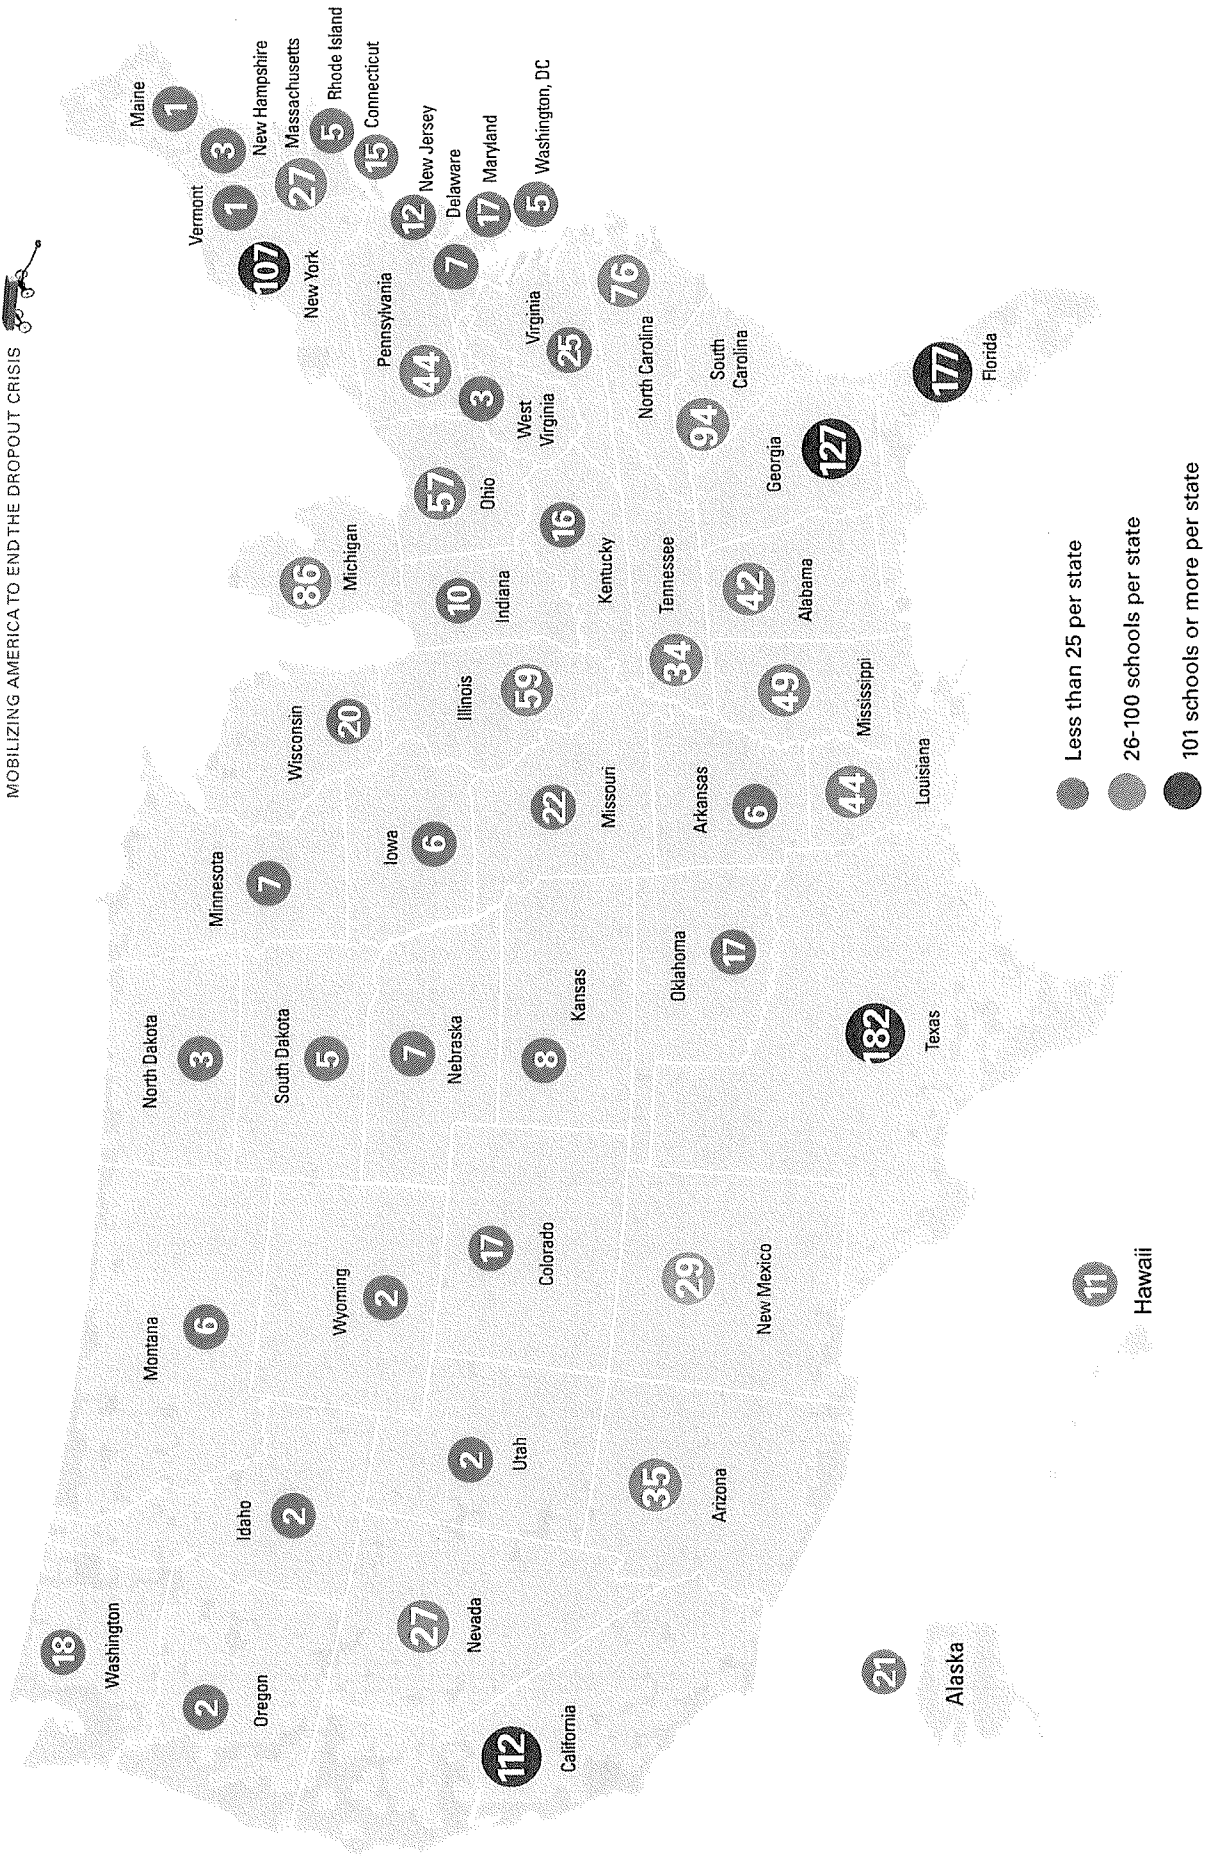

Over the long term, we expect communities to see improvements in these ten milestone indicators:

- Attendance
- Health care access
- 4th grade reading scores
- Out-of-school-time program participation
- Youth service participation
- 8th grade math and science scores
- Successful promotion from 9th to 10th grade
- State's adoption of new common core curriculum standards
- High school graduation
- Completion of a minimum 2-year post-secondary degree

These indicators will serve as a goalpost upon which the country can measure its progress as we work together to eliminate the dropout crisis in America.

GRADNATION

MOBILIZING AMERICA TO END THE DROPOUT CRISIS

2000 Lowest Performing High Schools

The nearly 2,000 lowest performing high schools below represent only about 13% of U.S. high schools and yet produce approximately 51% of the nation's dropouts. They produce 81% of Native American dropouts, 73% of African American dropouts, and 66% of Latino dropouts. In fact, 38% of all African American students and 33% of all Latino students attend these schools. By targeting this relatively small cohort of schools, we can make real progress on our goal to mobilize the nation to cut the dropout rate in half by 2018.
