

## **A Summary of North Carolina Data from the *Uncertain Times: Funding Insecurity Puts Afterschool Programs at Risk* Web-based Survey**

Today, a minority of North Carolina students benefit from afterschool programs while many youth in the state are unable to enroll because space is limited and funding is not keeping pace with demand. Afterschool programs provide a critical support that helps children do better in school and reassures parents that their children are safe and well cared for after the school day ends. Unfortunately, program leaders report that they are serving a high-need population; are serving more children than expected; and are struggling to maintain funding. Nearly all respondents to this web-based survey say that more children in their communities could benefit from afterschool programs, if programs were available.

58 North Carolina afterschool providers took the survey. They represent 255 program sites and serve more than 15,500 children. 55% percent of respondents are located in rural communities, 22% are in urban communities, and 22% are in suburban communities. The survey finds that in North Carolina during the 2005/2006 school year:

- 74% of afterschool programs operated at or above maximum capacity.
- 92% of respondents say that there are children in their communities who need afterschool programs and don't have access to them.
- 43% of respondents say that funding is down a little (20%) or a lot (23%) in the last two years. Another 33% say it is unchanged. Just 20% say funding is up a little and just 4% say funding is up a lot.
- If programs are able to see an increase in funding in the future, they are most likely to serve more children.
- Afterschool programs in North Carolina are serving a high-need population. More than half of respondents (59%) say that more than three in five students qualify for free or reduced price lunches.
- Parent fees are the most accessible funding resource in North Carolina. 45% percent of respondents rate parent fees as accessible or very accessible. Only 31% of respondents rate 21<sup>st</sup> Century Community Learning Centers, the only federal funding stream solely devoted to afterschool programs, as accessible or very accessible.
- About half (51%) of respondents feel fully secure about their funding for the next 1-2 years. Only 20% feel fully secure about their funding for the next 3-5 years.
- Program operators in North Carolina consider the top three barriers to participation in afterschool programs to be: transportation; not all children in one family are able to attend afterschool; and older youth need to work or care for younger siblings.

In sum, *Uncertain Times* finds that many afterschool programs in North Carolina are fully subscribed but still unable to meet the demand, and that budget cuts and stagnation prevent them from reaching more youth and families in their communities who could benefit from afterschool.

**Topline North Carolina Results from *Uncertain Times*:**

**Which of the following best describes your program's capacity during the 2005-2006 school year? (check one)**

- 19% We operated above maximum capacity and served more students than we had budgeted to serve.
- 55% We operated at maximum capacity.
- 26% We operated below maximum capacity and served fewer students than we had budgeted to serve.

Number of respondents: 58 (100%)

**What percentage of program participants qualified for the federal free or reduced lunch program? (check one)**

- 2% none
- 3% 1-30%
- 24% 31-60%
- 59% 61-100%
- 12% Unknown

Number of respondents: 58 (100%)

**During the 2005-2006 school year, what types of activities did your program offer youth? (Check all that apply)**

- 90% Homework Help
- 88% Arts/Music/Cultural Activities
- 88% Reading
- 78% Community Service
- 72% Science, Math and/or Technology
- 71% Mentoring
- 67% Obesity Prevention/Nutrition/Athletics/Recreation
- 66% Services for Parents and Families
- 59% Drug, Alcohol or Tobacco prevention programs
- 50% Violence prevention programs
- 45% Career and/or College prep
- 40% Pregnancy prevention programs
- 31% Language and/or ESL services
- 26% Services for Children with Disabilities
- 24% Other
- 21% Mental Health Services
- 9% Medical and/or Dental Services

Number of respondents: 58 (100%)

**In addition to after school, did your program offer services during the following times? (check all that apply)**

- 52% Holidays and/or inter-session
- 35% Before school

35% Weekends  
 28% None of the above  
 Number of respondents: 58 (100%)

**Did you offer a summer program?**

86% Yes  
 14% No  
 Number of respondents: 58 (100%)

**How has your funding changed over the last 2 years? (check one)**

23% Funding is down a lot  
 20% Funding is down a little  
 33% Funding is unchanged  
 20% Funding is up a little  
 4% Funding is up a lot  
 Number of respondents: 49 (85%)

**In the future, if you receive more funding, what change would you be most likely to make to your program? (Check one)**

39% Serve more children  
 22% Increase staff pay and/or benefits  
 16% Add variety of activities offered in the program  
 4% Add professional development  
 4% Add transportation services  
 4% Increase school-community partnerships  
 2% Add family services  
 2% Cut or decrease fees  
 2% Decrease staff/student ratio  
 2% Increase daily hours or number of days of service  
 2% Raise standards or criteria for hiring staff  
 0% Add field trips  
 0% Add holiday and/or weekend service  
 0% Add or increased food services offered  
 0% Add social services offered  
 0% Add summer program  
 0% None. I wouldn't make any changes.  
 0% Other  
 Number of respondents: 49 (85%)

*Methodology: UNCERTAIN TIMES used web-based survey software and the survey was emailed to more than 10,000 contacts in the Afterschool Alliance database in August and September of 2006. Recipients were encouraged to forward the survey to afterschool program staff, and programs were asked to be certain that only one person per program completed the survey and to provide responses from a site-level coordinator when possible. 2,614 responses were reviewed. 503 of them did not provide sufficient data to be included in the final analysis or were duplicate responses; therefore the final sample was 2,111 responses which represent approximately 9,813 afterschool sites serving more than 1.5 million children. (Many respondents are responsible for multiple sites.)*
