### **Nevada's Hines Chosen as One of Just 15 'Afterschool Ambassadors' in United States This Year**

*McKenna Hines Will Work in Nevada and Nationally to  
Increase Access to Afterschool Programs*

Washington, DC – The Afterschool Alliance today announced that McKenna Hines, the Elko County District Data Coordinator for 21 Century Community Learning Centers Program, has been selected to serve as a 2018-2019 Afterschool Ambassador. She is one of just 15 leaders in the country who was chosen for the honor this year, and one of two in Nevada. Each Afterschool Ambassador will continue leading a local afterschool program while also serving a one-year Afterschool Ambassador term, organizing public events, communicating with policy makers and in other ways growing awareness and support for afterschool and summer learning programs.

“We’re thrilled that Hines will serve as an Afterschool Ambassador this year,” said Afterschool Alliance Executive Director Jodi Grant. “Now more than ever, with federal funding for quality afterschool and summer learning programs under attack, we need strong advocates like her. She will mobilize parents, educators and business, community and faith leaders, among others, to help safeguard funding for the afterschool programs that keep kids safe, inspire them to learn and help give working families peace of mind. These programs offer hands-on learning opportunities, homework help, mentors, science and technology, healthy snacks and meals, sports and fitness, arts programming, college and job prep, and much more.”

“I am delighted to join in the Afterschool Alliance’s work to build support for afterschool programs,” said Hines. “In my two years working in the field, I’ve seen over and over again the extraordinary difference that afterschool makes in the lives of young people in Nevada. They help students explore their interests and discover their passions, while giving parents the security that comes from knowing their children are safe and supervised, with opportunities to learn and grow, after the school day ends. I look forward to building support for the out-of-school-time opportunities all students need.”

Between three schools, Elko County’s program currently serves over 600 students. The focus in 21<sup>st</sup> Century Community Learning Centers is to target the needs of each individual student through tutoring and enrichment opportunities before and after school. Together with 21<sup>st</sup> CCLC’s partners, students are provided with a well-rounded education that is inclusive to different aspects of knowledge through clubs such as Homework Help, STEM Club (Science, Technology, Engineering and Math) Cheerleading, Crochet Club, Science Club, Lego Club,

Health and Wellness and much more. Without 21<sup>st</sup> Century's partners, and the funding provided to the program, none of this would be possible.

Each Ambassador will organize a major event for *Lights On Afterschool*, the Afterschool Alliance's annual rally for afterschool, to be held on October 25 this year. Last year, 1 million people participated in some 8,000 *Lights On Afterschool* events across the United States and at U.S. military bases worldwide.

The [America After 3PM](#) household survey of more than 30,000 families, commissioned by the Afterschool Alliance, found that participation in afterschool programs has increased to 10.2 million students nationwide, up from 6.5 million in 2004. But the unmet demand for afterschool programs has increased as well. Today, for every child in an afterschool program, there are two more whose parents say they would participate, if a program were available. Unmet demand is especially high in rural communities and communities of concentrated poverty. One in five students in the United States today is unsupervised after the school day ends.

A large and growing body of evidence demonstrates improvements in attendance, behavior, academic achievement and more among children in afterschool programs. Researchers have also found that afterschool programs encourage increased parental involvement – an important building block for student success.
