

## Afterschool Programs in Florida

A powerful convergence of factors—including a lack of federal, state and local funding, and families and communities working with tight budgets—leaves 742,554 of Florida's school-age children alone and unsupervised in the hours after school. Afterschool programs are essential to keep kids safe, engage children in enriching activities, and give peace of mind to working moms and dads during the out-of-school hours. There are approximately 584,688 school-age children in afterschool programs in Florida. This includes 58,059 kids who attend 21<sup>st</sup> Century Community Learning Centers (21<sup>st</sup> CCLC)—programs that serve children living in high-poverty areas and attending low-performing schools. At a time when families and communities are struggling financially and kids are falling behind academically, afterschool programs are needed more than ever.

#### Afterschool Programs Are More than a Safe Space:

Afterschool programs not only keep kids safe, they also help improve students' academic performance, school attendance, behavior and health, and support working families:

- Ninety-four percent of middle school students attending 21<sup>st</sup> CCLC programs in Pinellas County, Florida maintained or showed growth in language arts (compared to 59 percent of nonparticipants), 84 percent maintained or showed growth in math (compared to 62 percent of nonparticipants) and 85 percent maintained or showed growth in science (compared to 40 percent of nonparticipants). (Silver, S.E., Ph.D., and Albert, R.J., 2011)
- A study of nearly 3,000 low-income students at 35 high-quality afterschool programs across the U.S. found students who regularly attended programs over the course of two years, compared to their peers who were routinely unsupervised during the afterschool hours:
  - Made significant improvements academically and behaviorally;
  - Demonstrated gains in their standardized math test scores; and
  - Saw reductions in teacher-reported misconduct and reduced use of drugs and alcohol. (Vandell, D.L., et. al., 2007)

# Need for Afterschool Programs in Florida by the Numbers:

**841,951** kids in Florida would participate in an afterschool program if one were available to them (36%).

**742,554** kids are on their own in the hours after school in Florida (25%).

**584,688** kids in Florida participate in afterschool programs (20%).

Attendance, behavior and coursework are three key indicators of whether a middle school student will likely graduate from high school.

An analysis of 68 afterschool studies found that students participating in high-quality afterschool programs went to school more, behaved better, received better grades and performed better on tests compared to students who did not participate in afterschool programs.

- Students who attended 21<sup>st</sup> CCLC programs made significant improvements in their classroom behavior, completing their homework and participating in class. Gains were also made in students' math and English grades. (Learning Point Associates, 2011)
- A study found that—after controlling for baseline obesity, poverty, race and ethnicity—the prevalence of obesity was significantly lower for children participating in an afterschool program when compared to nonparticipants. (Mahoney, et. al., 2005)

"Right now, the demand for affordable, quality afterschool experiences far exceeds the availability of these programs."

> -lleana Ros-Lehtinen U.S. House of Representatives (27th)

#### State of Federal Funding for Afterschool Programs in Florida:

In Florida, the 21<sup>st</sup> Century Community Learning Centers (21<sup>st</sup> CCLC) initiative is the only federal funding source dedicated exclusively to before-school, afterschool and summer learning programs. Investment in 21<sup>st</sup> CCLC programs helps ensure children from high-poverty and low-performing schools have access to a safe and supervised space; keeps kids involved in interest-driven academic enrichment activities that put them on the road to become lifelong learners; and helps support working families. Currently, 1,075,826 kids in Florida are eligible to participate in a 21<sup>st</sup> CCLC program. However, just 58,059 students attend a 21<sup>st</sup> CCLC program due to lack of federal funding.

### A Closer Look at 21<sup>st</sup> Century Community Learning Centers (21<sup>st</sup> CCLC)

- If the 21<sup>st</sup> CCLC initiative were funded at the fully authorized level, the Florida share would be \$121,528,440 for Fiscal Year (FY) 2013. The current amount appropriated is \$58,059,259.
- 200 additional grants in Florida could be awarded if full funding for 21<sup>st</sup> CCLC were available.

Estimated Number of Children Participating in 21 <sup>st</sup> CCLC Programs*		
FY2011	56,165	
FY2012	58,059	
FY2013	58,059	
*Numbers are based on the cost of \$1,000 per child

#### The Child Care and Development Fund (CCDF)

In 2012, the Child Care and Development Fund (CCDF)—which provides vouchers or subsidies for low-income parents to pay for child care, including preschool, before-school, afterschool and summer care for children ages 6 to 12—received \$5.21 billion. Although Pres. Obama's most recent FY2013 budget proposed an additional \$825 million national increase to CCDF, further support for this federal funding source will be necessary to promote greater access to quality afterschool programs.

Total FY2012 CCDF funds in Florida	Federal Share	Percentage of children receiving subsidies who are school-age
\$357,068,367	\$253,485,126	27%
