# Afterschool by the Numbers in New Hampshire

Afterschool Alliance

#### May 2014

More than a decade of research confirms that quality afterschool programs inspire and motivate children to learn, support children's social and emotional growth, and help raise their academic achievement. However, 6 percent of elementary school children, 35 percent of middle schoolers and 63 percent of high schoolers in New Hampshire are alone and unsupervised during the hours after school. Investment in quality afterschool is needed now more than ever to help address our country's growing opportunity and achievement gaps and support the overall well-being of children as they move through school, career and life.

### Afterschool Programs Keep Kids Safe, Inspire Learning and Support Working Families:

- A statewide evaluation of New Hampshire's 21<sup>st</sup> CCLC afterschool programs found that participants showed improvements in their academic performance during the school day. Teachers reported that 64 percent of student participants were more successful in finishing their homework and 60 percent increased their level of class participation. Ninety-eight percent of principals reported that 21<sup>st</sup> CCLCs improve students' attitudes toward school and 93 percent believe the programs boost students' motivation to learn. (Policy Studies Associates, Inc., 2012)
- A study of outcomes associated with participation in afterschool programs found that students regularly participating during the elementary school years showed a variety of gains, including:
  - Narrowing the math achievement gap at grade five between high-income and low-income students;
  - Improving work habits and self-efficiency; and
  - Reducing the number of school absences.
     (Auger, A., Pierce, K.M. and Vandell, D.L., 2013)
- Research on 21<sup>st</sup> CCLC programs shows that 21<sup>st</sup> CCLC participants made significant improvements in their classroom behavior, completing their homework and participating in class. Gains were also made in students' math and English grades. (Learning Point Associates, 2011)

## The Need for Afterschool in New Hampshire:

**60,735** kids in New Hampshire would participate in an afterschool program if one were available to them (32%).

**35,081** kids in New Hampshire participate in afterschool programs (16%).

**5,632** kids in New Hampshire participate in a 21<sup>st</sup> Century Community Learning Center (21<sup>st</sup> CCLC) program—programs that serve children living in high-poverty areas and attending low-performing schools.

### Afterschool's role in the ABCs of dropout prevention

Attendance, Behavior and Coursework are three key indicators of whether a middle school student will likely graduate from high school. An analysis of 68 afterschool studies found that participants in highquality afterschool programs go to school more, behave better, receive better grades and perform better on tests compared to students who don't participate in afterschool programs.

- A study found that—after controlling for baseline obesity, poverty, race and ethnicity—the prevalence of obesity was significantly lower for children participating in an afterschool program when compared to non-participants. (Mahoney, et. al., 2005)
- Researchers report that parental concerns about afterschool care cost businesses up to \$300 billion per year in decreased worker productivity. (Catalyst & Brandeis University, 2006)

"In NH, the 21<sup>st</sup> CCLC program and ELOs are leading the way, offering students new, engaging ways to acquire the skills, knowledge they need to succeed, both in school and in life."

> -Paul Leather Deputy Commissioner, NH Department of Education

### State of Federal Funding for Afterschool Programs in New Hampshire:

In New Hampshire, the 21<sup>st</sup> Century Community Learning Center (21<sup>st</sup> CCLC) initiative is the only federal funding source dedicated exclusively to before-school, afterschool and summer learning programs. Investment in 21<sup>st</sup> CCLC programs helps ensure children from high-poverty, low-performing schools have access to a safe and supervised space; keeps kids involved in interest-driven academic enrichment activities that put them on the road to become lifelong learners; and helps support working families. Currently, **43,176** kids in New Hampshire are eligible to participate in a 21<sup>st</sup> CCLC program. However, just **5,632** students attend a 21<sup>st</sup> CCLC program, due in large part to limited federal funding for programs.

| <b>31</b><br>Grantees                    | <ul> <li>If the 21<sup>st</sup> CCLC initiative were fully funded at the most recently authorized level, New Hampshire would receive \$12,250,000. The current funding for New Hampshire is only \$5,631,913.</li> <li>32 additional grants in New Hampshire could be awarded if full funding for 21<sup>st</sup> CCLC were available.</li> </ul> |  |

### The Child Care and Development Fund (CCDF):

FY2014 funding for the Child Care and Development Fund (CCDF)—which provides vouchers or subsidies for lowincome parents to pay for child care, including preschool, before-school, afterschool and summer care for children up to age 12—was \$5.3 billion. Although Pres. Obama's most recent 2015 budget proposed an additional \$807 million increase to CCDF, further support for this federal funding source will be necessary to promote greater access to quality afterschool programs.

| Total FY2013 CCDF Funds<br>in New Hampshire | Federal Share | Children Receiving Subsidies<br>Who Are School Age |
|---|---------------|--|
| \$26,517,699                                | \$15,784,562  | 22%  |

The Afterschool Alliance is a nonprofit public awareness and advocacy organization working to ensure that all children and youth have access to quality afterschool programs. More information is available at www.afterschoolalliance.org.
